

Dear Madam/Sir,

**WOODual** – Wood Sector and Dual Learning for Youth Employment and Skills – is an Erasmus+ Project, **aimed to proposing an integrate and complete strategy for improving youth employability and a better school-to-work transition.** 

The crucial point of the WOODUAL project is the belief that a successful action for the development of technical, communicative and organizational skills should include a learning experience in the working environment in a transnational framework. This means that the skills must not be acquired just with a theoretic process but rather through a practical educational process with learning materials created on purpose to allow the student to think about their own experience in the company and about the working process, they carry out every day.

Today we are glad to send you our Newsletter N. 2 which summarizes the results achieved by the project so far and the realization of the Output 4 of our project:

• WOODual project Newsletter N. 2

We would also draw your attention toward the "DESIGN FRAMEWORK FOR TRANSNATIONAL WORK BASED LEARNING PROGRAMME" by the German Italian Chamber of Commerce in collaboration with WOODual Partners.

Wood sector and Dual Learning for Youth Employment and Skills

To get **more information** about the project please check our interview to Giovanni Albetti, WOODual's leading partner

To keep up to date we invite you to subscribe to the WOODual Newsletter here:
